

QUMAS DocCompliance Crystal Reports Integration Training

To help you achieve maximum return on your QUMAS DocCompliance investment by enhancing your reporting capabilities, QUMAS provides a training program to help you learn how to develop highly customized reports from critical QUMAS data. The learning objectives of this training program include:

- High level overview of the capabilities of Crystal Reports
- High level overview of the QUMAS DocCompliance data schema as it relates to reporting
- Examples of valuable reports you can generate
- Training on how to develop your own reports
- Where to go to learn more and further develop your skills

Who Should Attend?

All attendees should have prior Crystal Reports Training or experience and be familiar with QUMAS DocCompliance. This course is intended for users who will actually develop DocCompliance reports for their company. The course and accompanying labs will be run using the DocCompliance 4.01 Oracle platform product or the platform that is installed at your site (if the training takes place on your site). A working knowledge of SQL and relational databases is preferred, but not required. An introductory course to understand the creation and formatting of reports and Database connection is helpful but not necessary.
